## (54) PYRAZOLOPYRIDINE DERIVATIVE AND PLATELET AGGREGATION INHIBITOR CONTAINING SAME

(57)Abstract:

PURPOSE: To provide a novel compound useful for circulatory organ disorders such as cardiac infarction, pulmonary embolism, peripheral arterial embolism, cerebral thrombosis, and cerebral infarction.

CONSTITUTION: The compound of formula I (R1 is H, lower alkyl, phenyl, etc.; R2 is halogen, hydroxy, lower alkoxy, etc.; R3 is H, lower alkyl, carbamoyl, etc.; R4 is lower alkyl, (substituted)phenyl, pyridyl, etc.; X is H, halogen, lower alkyl, lower alkoxy), e.g. 4-amino-1-(4-chlorophenyl)-6-1H-pyrazolo[3,4- b]pyridine-5-carboxylic acid ethyl ester. The compound of formula II is obtained by reacting a compound of formula II with a compound of formula III (R11 is lower alkyl; Me is methyl) in the presence of a Lewis acid in a solvent (e.g. toluene) at -20 to 150°C and subsequently reacting the produced compound of formula IV in the presence of a base (e.g. sodium methoxide) at -78 to 30°C.
